

BOWMAN ROAD Bridges Improvement Project

The north and south reinforced concrete bridge decks along Bowman Road have been widened. The reinforced steel traffic barriers on the northbound lanes have also been placed for both bridges, however, placement of traffic barriers and pedestrian sidewalks on southbound traffic lanes are currently pending.

The opening of Bowman Road to the public is a bit delayed due to pending work with Union Pacific Railroad and PG&E. The project is now anticipated to wrap up in late February 2020, subject to weather conditions.

Construction crews have been working hard during the week and weekends under the bridge to get as much done as possible. Unanticipated repairs to the underside of the existing reinforced concrete bridge decks are currently in progress. For more updates or to check out progress photos, visit the [project website](#).

Placer County is working to complete construction in the most efficient and safest way possible. We appreciate your continued patience and cooperation as we complete this important infrastructure project. Please continue to help us spread the word about the project by sharing this information.

If you would like to be removed from these e-blasts, please respond with the word 'Remove' in the subject line. Thank you for your continued support!
